Introduced one after another to medical facilities (corona ward, fever outpatient) government facilities! Japan's first visible light 405nm LED lighting "Clean Linear"

Japan's first clean linear measures against corona! Infectious disease control support subsidy project in Tokyo until March 31!

G-Smatt Japan Co., Ltd. tearby one

January 20, 2022 15:30

G-Smatt Japan Co., Ltd. (Headquarters: Shibuya-ku, Tokyo, Representative Director: Kagehito Yanagi) is the first medical-related company to introduce LED lighting "Clean Linear" with a wavelength of visible light of 405 nm. Introduced to Full Clinic (Director Yoji Sato / Koshigaya City, Saitama Prefecture).

<Interview after introduction>
At Koshigaya Heartful Clinic, which is strengthening infection control measures for the new coronavirus, "Clean Linear" has been introduced so that you can receive medical treatment with peace of mind and also for an environment where you can work with peace of mind at our hospital. I did. "

■About
Clean Linear "Clean Linear", which was confirmed to suppress the virus by visible light 405 nm LED at the Department of Microbial Infectious Diseases, Nara Medical University School of Medicine in June 2021, is available at medical facilities, government offices, schools, and schools. It is the most suitable lighting as a "new lifestyle to prevent the spread of infection" such as places where outbreaks can occur such as commercial facilities and places where ventilation is not possible due to lack of windows. Clean Linear has been confirmed to be effective not only for viruses but also for bacteria related to food poisoning at overseas organizations.

Hospital (Corona ward, fever outpatient department, treatment room, passage, etc.)
Government office (reception room, play equipment facility)
Office (reception room)
